## THE PAKUBUWONO SPRING IN JAKARTA, INDONESIA

JOINT SEALING: SikaHyflex®

BUILDING TRUST

# NEW PREMIUM APARTMENT COMPLEX IN JAKARTA

## PROJECT DESCRIPTION

The Pakubuwono Spring is a new premium apartment complex in Jakarta with close proximity to attractive locations such as Sudirman, Kebayoran Baru, Pondok Indah, and Permata Hijau. The Pakubuwono Spring residents will enjoy easy access from their residences to popular business, financial and commercial districts.

These elegant apartment towers will boast unprecedented standard of luxury living, with a wide range of beautifully designed private facilities, advanced technology of mechanical engineering, and integrated systems of safety and security that will ensure the most promising and enjoyable living experience in the city.

## PROJECT REQUIREMENTS

For the installation of precast facade a low modulus sealant was needed. Good movement capabilities performance to seal the joints, overpaintability and excellent UV resistance were a must.

# THE PAKUBUWONO SPRING, JAKARTA
